Shakespeare's Greenwood. Less than three hours' travel fro dirty, busy London is the forest Arden, which is ballowed in the mir of all who speak English by the facthat Shakespeare found in it the inspi ration for his woodland scenes, an e-pecially for the fantastically beauti ful ones of "A Midsummer Nighth Dream," The great only under which his fairles danced still stretch out their branches over the shadow-dappled sward.

How Seeds Are Distributed.

Among the most curious merhads of seed distribution are those seeds which are carried through the nir on wings, such as the maple, which has two wings, and the catalysi, the elm the neh and the pine. These sends do not thep their wings like birds, but depend altogether upon the force of the would be cares them afong. Other floating scode are the milkweed, this tie and dandel on.

Unknown Influences.

The rhythmic law of nature merits wide study. But we have collected enough exidence to show that body prowth in children, body weight in minitis appetite for food fitness for more: the recurrence of Illinois; periodie mental depression, tendency to grime, impulsion to suicide, rise and fall of blood temperature, and falling In love are all influenced by a mysterisnew resolution.
